

SafeReceipts + ReturnFlow

Problem

For Retailers

- Customers lose receipts → disputes at returns desk
- Fake or reused receipts → fraud losses
- Manual return approvals → staff time wasted
- No clear data on why products are returned

For Customers

- Paper receipts fade or get lost
 - Returns are stressful and inconsistent
 - Refunds are slow and unclear
 - No easy way to track warranties
-

Solution

SafeReceipts

A **digital receipt system** that replaces paper receipts with secure, verifiable digital proof of purchase.

ReturnFlow

A **simple returns management tool** connected to each receipt.

Together, they make post-purchase simple.

How It Works

For Retailers

1. Issue a digital receipt at checkout (QR or phone number).
2. Receipt is stored securely in the customer's wallet.
3. If the customer wants a return, they tap “Request Return.”

4. Retailer approves inside a simple dashboard.
5. Refund is processed.

No lost receipts. No arguments. No manual searching.

Value to Retailers

1. Reduced Fraud

- Each receipt is uniquely verified.
- Prevents reuse or fake paper receipts.

2. Faster Returns

- No checking faded paper slips.
- Clear purchase history.
- Structured approval flow.

3. Lower Operational Costs

- Less staff time spent resolving disputes.
- Fewer escalations.

4. Better Insights

- See return reasons.
- Track product issues.
- Identify repeat abuse patterns.

5. Customer Trust

- Modern, transparent process.
 - Professional experience.
-

Value to Customers

1. Never Lose a Receipt

All receipts stored digitally.

2. Easy Returns

Submit a request from your phone. Track status in real time.

3. Faster Refunds

Clear approval flow reduces waiting.

4. Warranty Tracking

Know when the product warranty expires.

Why This Matters in Ghana

Retailers like:

- Melcom Ghana
- Franko Trading Enterprise
- Jumia Ghana

Handle large volumes of returns manually.

There is **no standardized digital receipt infrastructure** today.

This creates fraud risk and poor customer experience.

SafeReceipts + ReturnFlow fills that gap.

Business Model (Simple)

- Monthly retailer subscription
- Small fee per return processed (optional)

No consumer fees.

The Vision

Make digital receipts the standard. When every purchase has verified proof, returns become simpler, fraud is reduced, and retailers gain post-sale visibility.
